

## Automatically Configuring iPhone for use with Otterbein's Email / Calendar / Contacts

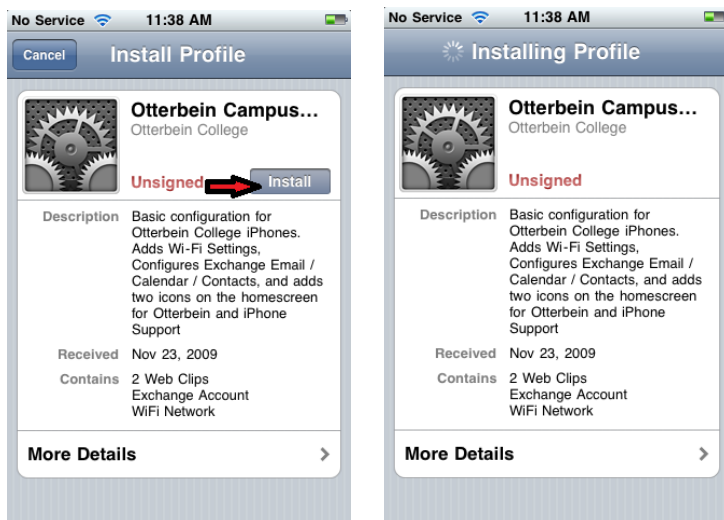

Here are some screenshots and instructions for automatically configuring email on your iPhone 3G or iPhone 3GS :

Step 1 : (Very Important) Before doing anything else, make sure that your iPhone is connected to some sort of internet connection. You can do this by opening up Safari and browsing to a few websites just to make sure. If you are not connected to the Internet via WI-FI or 3G internet connection, setting up your email will not work.

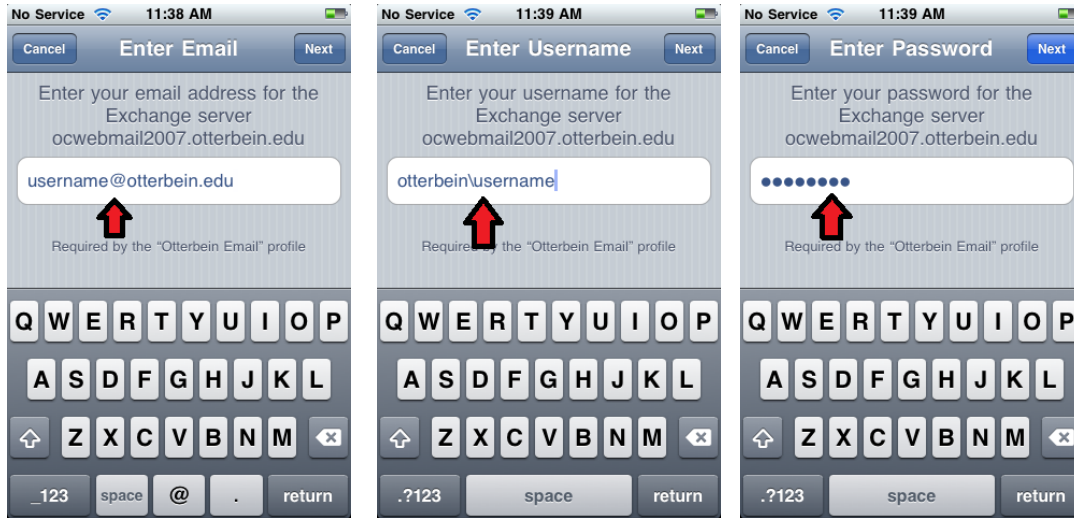

Step 2 : Open up Safari Web Browser, browse to : <http://www.otterbein.edu/ITS/iPhone> and click "Automatically Configure iPhone"

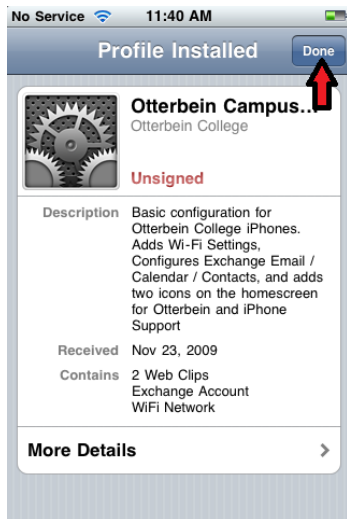

Step 3 : Tap "Install" Note: This will change some settings on your phone. If you would rather enter all of the configuration settings manually, hit "Cancel" and follow the directions for manually configuring your iPhone. If you do choose to have your iPhone automatically configured, all changes can be removed.

#### Step 4 : Enter your Email Address, Username, and Password

Step 5 : Tap “Done” to complete the profile install. You should now be able to go back to your “Home Screen” and check your Inbox / Contacts / Calendar and be sure they are syncing. That’s pretty much it! You should be all connected!

## Instructions for removing the Auto Configuration Profile

Step 1 : Tap “Settings” on the Home Screen

Step 2 : Tap “General”

Step 3 : Scroll down to “Profile : Otterbein Campus Config” and Tap it

Step 4 : Tap Remove and the profile will be removed!
