

ALUMNI INSIGHTS VIRTUAL SERIES

Discussing Timely Topics with
Accomplished Otterbein Grads

Tonight's Topic:

Serving Children with Identified Neurodivergence

Fellow alumni and current students are invited to join us on Zoom as we hear from two accomplished Otterbein alumnae pediatric occupational therapists discussing the role of occupational therapy in diagnosis and treatment of children with neurodivergence.

Learn more about treatment options for children and families and about how to advocate for your child or family member within the context of the healthcare system.

Dr. Calli Studebaker '14 and **Dr. Claire LeGendre '19** will also discuss their employment within the field of occupational therapy. Moderated by Otterbein's Dr. Shelley Payne.

Neurodivergence is a non-medical umbrella term that refers to a wide range of conditions including autism, dyslexia and attention-deficit hyperactivity disorder (ADHD).

DATE & TIME:

**TUESDAY,
MARCH 26, 2024
7 - 8 P.M.**

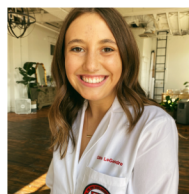

ON ZOOM
