## Otterbein University Class of 2015 Student Quotes

*"The thing I most value from my time at Otterbein is how my courses, professors, and experiences made me into a completely different person. I used to be shy and quiet, and I have grown into an outgoing and communicative individual with respect for others and the world around me. I definitely wouldn't be where I am today if Otterbein hadn't brought me out of my shell and showed me who I really am and who I can be in life. "*

*"The variety of classes I took and the professors I had encouraged me to think more openly and critically about world issues and how we live our lives. I learned that thinking, analyzing, and writing are very important and always having the passion to learn is more important than anything."*

*"I especially value the relationship students were able to have with the professors, and how helpful the professors were. I also value the small school atmosphere, and the closeness to classmates that comes from it."*

*"In both my curricular and extra curricular work, I was exposed to new ideas that broadened my understanding of the world and my commitment to make the world a better place. My university was committed to community service, civic engagement, and social justice work, all of which I became very involved in and has made the biggest impact on my life outside of my undergraduate experience."*
