

UNDERGRADUATE OUTCOMES

Each year Student Success and Career Development (SSCD) collects data on the outcomes of our undergraduate students. A survey was launched in November of 2025 and additional research was conducted by SSCD staff in the following months.

This year a **76% knowledge rate** was achieved, through survey responses and additional information collected by Otterbein staff and faculty. Results revealed a **93.1% placement rate**. Placement is defined as a graduate either employed, continuing their education, or serving in the military within six months of graduation.
